# Your Career in Building and Construction

What makes AGC Training such a popular option is that the training is practical and hands-on, reflecting real-life experience. The tutors all have real experience in their various sectors and are passionate about equipping people with the skills to build bright and successful futures.

## Trade Academy Carpentry Level 3

Trades Academy programmes are for current secondary school students, who study one or two days a week over three or four terms and gain credits towards NCEA. The learning takes place on our farm, and is practical and hands-on, using industry standard equipment and technology relevant to the building and construction sectors. Students develop the foundation skills needed to progress to further study, or move directly into employment.

## Introduction to Trade and DIY skills Level 2

Learn the basics of building with this foundation programme. Find out which tools to use when, how to measure twice and cut once. You'll get lots of practical experience to give you confidence to get the job done. This programme is open to anyone and no worries if you don't already have any qualifications. All you need is the desire to get started. This programme pathways to further study with us on Level 3 courses in Carpentry or Painting & Decorating.

## Painting and Decorating Level 3

From new builds to renovation, residential to commercial and industrial structures, indoor and outdoor, there will always be a need for these skills. Learn how to use the right equipment to get the job done, find out how to order the right amount of materials, prepare surfaces and get painting.

## Carpentry Level 3

Study with us and learn the theory and then put it all to practice by building a relocatable house on our site from the ground up. We also get you genuine industry experience by linking you up with local builders where you'll be placed for up to two days per week. Carpentry Level 3 prepares you for a job onsite or further study to complete your apprenticeship at Level 4

## Carpentry Level 4\*

This programme will enable people to study in the building industry as an apprentice to become a qualified carpenter. The underpinning skills and knowledge will also provide entry into other industry sectors which was identified as a need by the Master Builders of New Zealand. This programme provides a progression for those who have successfully completed the New Zealand Certificate in Construction Trades (Carpentry) Level 3, or are already working in the industry.
